

Immediate opening for a **Process Manager** who will be responsible for all technical aspects of the press operation, process optimization, asset reliability, and troubleshooting of the daily operation. The Process Manager will also be responsible for optimizing manufacturing cost through technical improvements to the operation. This will include: evaluating manufacturing issues to determine root cause, implementing technical solutions, driving savings through implementation of processing and technology improvements and supporting implementations of new press equipment and processes.

### **Core responsibilities**

- Oversee the technical operation of the Press Department, providing guidance on resolution of processing equipment issues. This will often times require hands-on work.
- Troubleshoot the process and make changes to the recipes, operating parameters, etc. to ensure product quality and specifications are met, as well as optimization of throughput and efficiency.
- Plan/Coordinate shutdowns and PM efforts with the assistance of the Maintenance Manager and Production Leadership.
- Coordinate machine rebuilds and spare parts inquiries between equipment manufacturers and maintenance in conjunction with the Plant Engineer to ensure justification, request, design, implementation, start-up, and sustainability of new investments.
- Develop Reliability Improvement Plans for each production system and ensure execution.
- Drive employee engagement, training and development to maximize safety, quality, and productivity.

### **Key Attributes**

- Continuous, unfaltering focus on safety (the inability to walk past an unsafe act or condition)
- Rational problem solver
- Rigorous approach to job responsibilities (strong initiative)
- Self Directed

### **Qualifications**

- BS in Engineering (preferably Chemical or Mechanical) or related field is desired
- Minimum 5 years experience in a technical field, preferably food manufacturing or consumer goods industry
- Fixed Assets Maintenance responsibilities
- Personnel Supervision (technical teams, contractors or other 3<sup>rd</sup> parties)
- Development, execution, and start-up of engineering projects (minimum of \$250,000 budget)
- Must have hands-on troubleshooting skills
- Knowledge and experience in implementing:
  - Mistake-Proofing
  - TPM/Autonomous Maintenance
  - Zero Loss Culture
